Daniil Vyazemskiy
Senior Full Stack Developer

👤 Profile

Goal-oriented senior IT specialist with 6+ years of experience developing so many websites and maintaining them. My main skills are React, Vue, Angular and Node.js. In react I can manage states by using redux-thunk, redux-saga and react-query. Managing state technically definitely makes me stand out from my peers. Especially I mastered react hook and you will be staisfied by my work which bring a good result with amazing performance. Using Gatsby and Next.js, I can make you experience the greatest result. **Customer is a king** and my fist priority is always client.

As I am a **strong contributor**, I am definitely looking for a place where I can grow and make a **long-term contribution**.

💼 Employment History

Senior MERN stack developer
January 2017 — February 2021

Worked as a full-stackdeveloper and team lead. At first I am mainly responsible for designing and build server-side by node. And then my consisten high performance was valued by employer, I was placed in managing whole project. It was really growing experience for me.

Web Designer
December 2015 — November 2016

I excel in designing websites. From my professional perspective, all my designs turned out to popular products. I think my design skill gave me the edge over other front-end developers.

🎓 Education

Mariupol State University

Mauris magna sapien, pharetra consectetur fringilla vitae, interdum sed tortor.

Epic React(Kent C. Dodds)

Passing through this professional course really honed my react skill.
